Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cosman(US6006126, of record). Cosman teaches co-registry of tool or calibration rod 1 bearing either light sources or reflectors by use of paired cameras 4,5 using spatial registry transforms within graphics processor DP. It would have been inherently obvious to map a severality of such tool positions. In the co-registry method as defined in cols. 6-7, the cameras are mapped or digitized for spatial localization whereupon the cameras may be said to be mapped to the probe, or vice versa, or both with respect to an arbitrary frame of reference defined by the transformation protocol.

Claims 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cosman as applied to claims above, and further in view of Zanakis (US5630422). The former in col. 2 lines 17-28 embraces microscope tool registry, whereupon a stand or support for same would be inherent since such is not a freehand device. It would have been obvious in view of Zanakis to incorporate passive infrared reflectors for the reflectors of Cosman since these were known to provide reliable fiducials less sensitive to radiation noise.

Art Unit: 3737

Claim 23 stands withdrawn from consideration, having been non-elected without traverse in Paper No. 7.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
